MEASURING GUIDE

For all measurements:

- Prepare a soft measuring tape
- Make all measurements wearing a non-padded bra
- Make all measurements without shoes
- Have you arms relaxed naturally by your side
- Do not overtighten the measuring tape
- Ask a friend to help you
- Breath naturally

CUSTOM SIZE MEASUREMENTS

(T) Upper bust – make all measurements wearing a non-padded bra. Keep this measurement horizontally straight, keep measuring tape loose enough to insert one finger between body and tape. Wrap the measuring tape around your torso under the armpits and above the bust.

(F) Medium bust – make all measurements wearing a non-padded bra. Keep this measurement horizontally straight, keep measuring tape loose enough to insert one finger between body and tape. It is not your bra size! Wrap the measuring tape around the fullest part of your bust (at nipple level).

(LB) Lower bust – keep this measurement horizontally straight, keep measuring tape loose enough to insert one finger between body and tape. Wrap the measuring tape around your chest directly under your bust.

(G) Waist – wrap measuring tape around your natural waistline, which is located above your belly button and below your rib cage (usually 1 inch above belly button).

(H20) Hips – stand naturally, bring your feet together, and wrap a measuring tape straight around the widest part of your hips.

(H) Height – stand barefoot straight with your back and hands against the wall and your heels touching the wall as well. Place a mark where the top of your head meets the wall and measure the distance from that point to the floor.

(D) Waist to floor – stand up barefoot straight and keep your feet together, measure from your waistline along either side of your body down to the floor.

(A) Front corset – this measurement is taken from the point where your shoulder meets your neck right above the collar bone on either side of your neck over the center of the fullest part of your bust down to your waist line.

For dresses with sleeves:

(M) Sleeve length – have your arms relaxed naturally by your side. Measure the desired length of the sleeves down from the point where your arm meets your shoulder.

For dresses with sleeves:

(BR) Arm girth – measure your arm's fullest part of the upper part of your arm.

(B) Bust height – Begin at the base of your neck and bring your tape measure down to the center of the fullest part of your bust.

(S) Back span – Bring your tape measure from the left armpit to the right armpit across the back. Measure in a straight line over your back.

(L) Back corset – This measurement is taken from the point where your shoulder meets your neck right above the collar bone. Measure vertically down from there along your backside to the middle of the ribbon tied around your waist.

(N) Shoulder span – To take this measurement relax your shoulders, find the bone where your arms and shoulders meet at the top of each shoulder. Measure from one point to the other in a straight line, across the back's natural curve.
